

# Mimecast Enterprise Information Archiving

A single, secure and accessible cloud archive for your business' most important information.

**Mimecast delivers a secure, dependable and highly scalable solution to meet growing information management challenges. A single, tightly integrated cloud platform delivers unified and secure archiving of emails, files and IM conversations. It supports rapid access to content for compliance with regulations, comprehensive e-discovery and litigation readiness as well as granular user search.**

## KEY FEATURES:

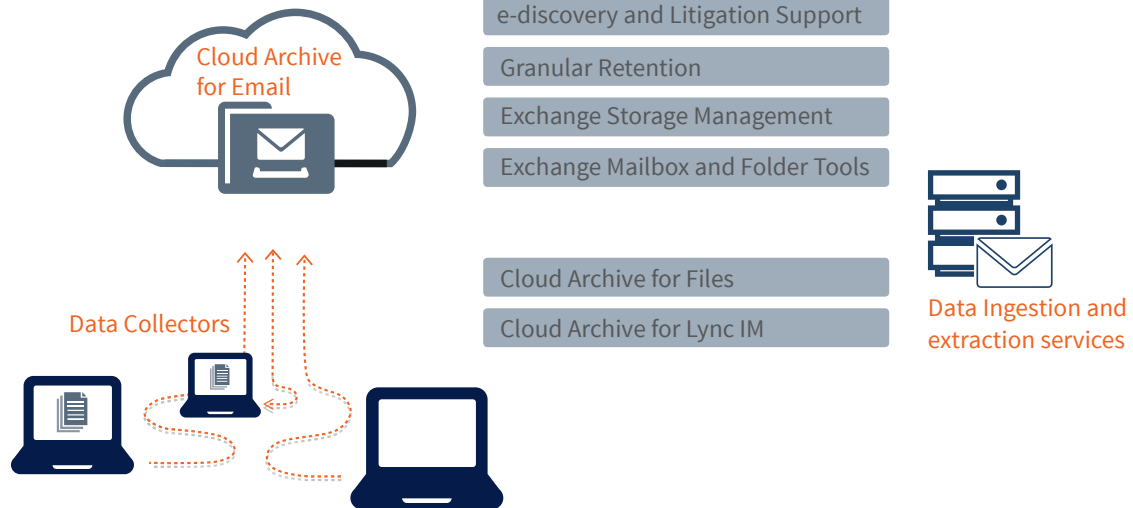

- A single, secure cloud platform with unified search for rapid access to all archived content – email, files, IM
- Archive integrity is provided through compliance driven chains of custody for all your archive data
- Perpetual retention ensures a long term archive is available to support compliance and e-discovery without needing to deploy any additional hardware or significant software
- Folder based retention and replication of a user's Exchange mailbox folder structure combined with Exchange mailbox management for mail store size control
- Intuitive and powerful desktop and mobile apps empower user to search and access their archived content without the need for IT support
- A single, unified administration console to manage all archive policies and access reporting
- Historical email archive content can be ingested into the Mimecast archive to deliver a single repository of all archive information

## KEY BENEFITS:

- Instantly protect valuable intellectual property assets with a purpose-built, highly secure and trusted cloud platform supported by a 100% service availability SLA and guaranteed data storage region
- Delight users and speed workflows with rapid search and content retrieval through a single, intuitive search interface across a choice of desktop and mobile apps
- Comprehensive compliance, e-discovery and litigation support through compliance driven chains of custody for all your archive data
- Reduce cost and complexity through a single cloud platform and administrative console

### Mimecast Enterprise Information Archiving

#### CLOUD ARCHIVE FOR EMAIL

### An interactive email archive in the cloud

#### Reduce migration risk and increase speed of migration

Email archiving is crucial for compliance and adherence to best practise. But how can you derive more value from vital email data?

#### Boost user productivity and insight with instant access

The Mimecast interactive archive is a highly accessible, bottomless mailbox with all inbound, outbound and internal email. This means end users can rapidly search and retrieve their email data stored in the Mimecast cloud through a choice of desktop tools and mobile apps.

#### Central control, security & governance

Administrators retain control of email retention policies, with three encrypted copies stored in separate locations. Granular litigation hold, e-discovery and reporting capabilities help support compliance.

#### Lower IT overhead & rapid ROI

Mimecast's email archiving solution means a lighter load on servers and fewer technical support requests for archive searches, lost emails and mailbox performance issues. You get comprehensive email storage without the need to invest in new hardware or software or go through lengthy consultative deployments.

#### Peace of mind

Multiple geographically dispersed data centers offer built in redundancy and allow us to offer a 100% service availability SLA.

### Data collectors

The Mimecast integrated archive architecture means other sources of content can be easily retained alongside email to provide a richer source of historical data to help remain compliant, reduce risk and avoid complexity.

### Cloud Archive for Files

Store file data including: document libraries, home drives, network file shares. Administrators are provided with a flexible and granular policy based system to identify files to be archived. This includes the ability to archive files based on file type and attribute - including file size, last modified date, created date, and last accessed date. This ensures that administrators have full control over the type of data being archived.

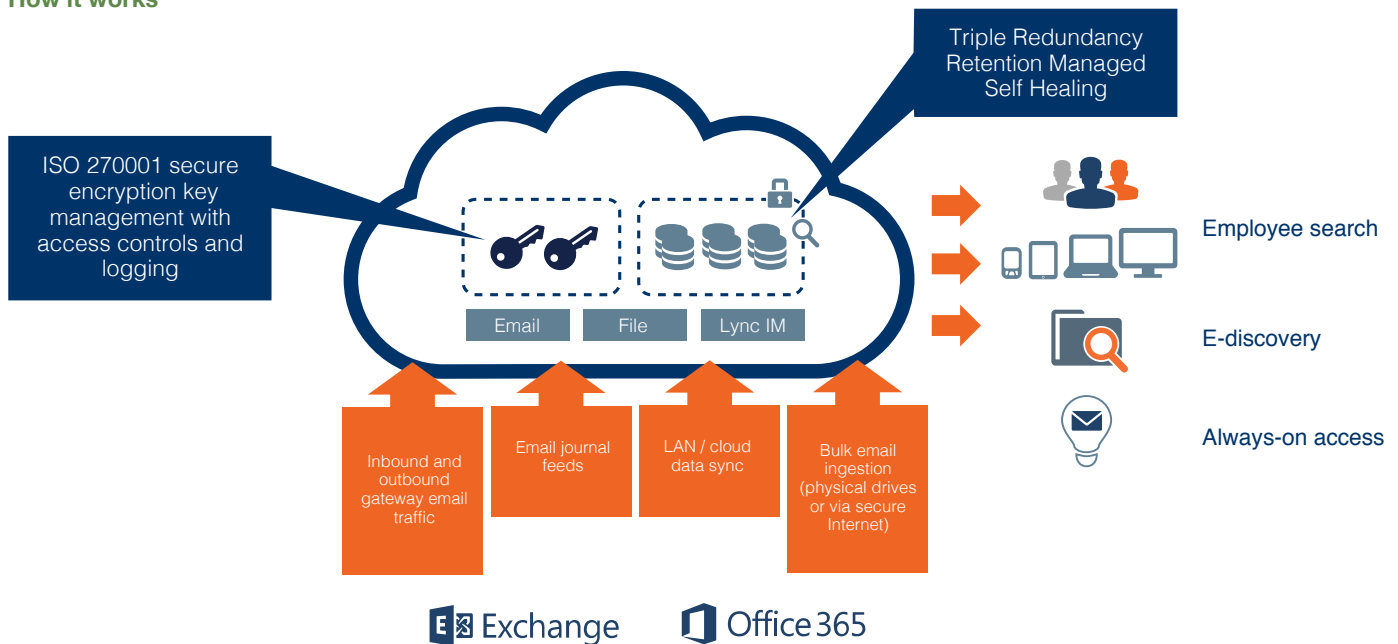

### Cloud Archive for Lync IM

Archive all Microsoft Lync® IM conversations into the Mimecast archive for instant access to enterprise IM chats, transferred files and shared content from a single search interface.

Mimecast provides a cloud-based compliance driven archive for all peer to peer and multiparty Microsoft Lync® Instant Messages; including transferred files, shared presentations and whiteboards.\*

\*Whiteboards are archived for Lync® 2013.

### How it works

### Mimecast Enterprise Information Archiving - Capabilities

Mimecast Enterprise Information Archiving is available as a standalone service or as part of our Unified Email Management Enterprise Bundle. The Cloud Archive for Email core service provides the base functionality which can be expanded using a selection of service add-ons.

Cloud Archive for Lync IM	Lync IM Archiving to retain Microsoft Lync peer to peer and group IM	□

Mimecast makes business email and data safer for more than 13,000 customers and millions of employees worldwide. Founded in 2003, the Company's cloud-based security, archiving and continuity services protect email, and deliver comprehensive email risk management in a single, fully-integrated subscription service. Mimecast reduces email risk and the complexity and cost of managing the array of point solutions traditionally used to protect email and its data. For customers that have migrated to cloud services like Microsoft Office 365, Mimecast mitigates single vendor exposure by strengthening security coverage, combating downtime and improving archiving.

Mimecast Email Security protects against malware, spam, advanced phishing and other emerging attacks, while preventing data leaks. Mimecast Mailbox Continuity enables employees to continue using email during planned and unplanned outages. Mimecast Information Archiving unifies email, file and Instant Messaging data to support e-discovery and give employees fast access to their personal archive via PC, Mac and mobile apps.
