

PA-5200 SERIES

Palo Alto Networks® PA-5200 Series of next-generation firewall appliances comprises the PA-5280, PA-5260, PA-5250 and PA-5220, which are ideal for high-speed data center, internet gateway and service provider deployments. The PA-5200 Series delivers up to 68 Gbps of throughput using dedicated processing and memory for the key functional areas of networking, security, threat prevention and management.

Key Security Features

Classifies all applications, on all ports, all the time

- Identifies the application, regardless of port, encryption (SSL or SSH) or evasive technique employed.
- Uses the application, not the port, as the basis for all of your safe enablement policy decisions: allow, deny, schedule, inspect and apply traffic-shaping.
- Categorizes unidentified applications for policy control, threat forensics or App-ID™ technology development.

Enforces security policies for any user, at any location

- Deploys consistent policies to local and remote users running on the Windows®; Apple® Mac® OS X®, macOS® and iOS; Linux; and Android® platforms.
- Enables agentless integration with Microsoft® Active Directory® and Terminal Services, LDAP, Novell® eDirectory™ and Citrix®.
- Easily integrates your firewall policies with 802.1X wireless, proxies, NAC solutions and any other source of user identity information.

Prevents known and unknown threats

- Blocks a range of known threats, including exploits, malware and spyware, across all ports, regardless of common threat-evasion tactics employed.
- Limits the unauthorized transfer of files and sensitive data, and safely enables non-work-related web surfing.
- Identifies unknown malware, analyzes it based on hundreds of malicious behaviors, and then automatically creates and delivers protection.

PA-5200 Series

The controlling element of the PA-5200 Series is PAN-OS® security operating system, which natively classifies all traffic, inclusive of applications, threats and content, and then ties that traffic to the user, regardless of location or device type. The application, content and user – in other words, the elements that run your business – are then used as the basis of your security policies, resulting in an improved security posture and a reduction in incident response time.

Performance and Capacities	PA-5280	PA-5260	PA-5250	PA-5220
Firewall throughput ¹ (App-ID enabled)	68 Gbps	68 Gbps	39 Gbps	18 Gbps
Threat Prevention throughput ²	30 Gbps	30 Gbps	20 Gbps	9 Gbps
IPsec VPN throughput	24 Gbps	24 Gbps	16 Gbps	8 Gbps
Max sessions	64,000,000	32,000,000	8,000,000	4,000,000
New sessions per second ³	462,000	462,000	348,000	171,000
Virtual systems (base/max ⁴)	25/225	25/225	25/125	10/20

1. Firewall throughput measured with App-ID and logging enabled utilizing 64KB HTTP transactions
2. Threat Prevention throughput measured with App-ID, IPS, antivirus, anti-spyware, WildFire and logging enabled utilizing 64KB HTTP transactions
3. New sessions per second measured with application-override utilizing 1 byte HTTP transactions
4. Adding virtual systems over base quantity requires a separately purchased license

Networking Features

Interface Modes

- L2, L3, tap, virtual wire (transparent mode)

Routing

- OSPFv2/v3 with graceful restart, BGP with graceful restart, RIP, Static routing
- Policy-based forwarding
- Point-to-point protocol over Ethernet (PPPoE) and DHCP supported for dynamic address assignment
- Multicast: PIM-SM, PIM-SSM, IGMP v1, v2 and v3
- Bidirectional Forwarding Detection (BFD)

IPv6

- L2, L3, tap, virtual wire (transparent mode)
- Features: App-ID, User-ID™, Content-ID™, WildFire® and SSL decryption
- SLAAC

IPsec VPN

- Key exchange: manual key, IKEv1 and IKEv2 (pre-shared key, certificate-based authentication)
- Encryption: 3DES, AES (128-bit, 192-bit, 256-bit)
- Authentication: MD5, SHA-1, SHA-256, SHA-384, SHA-512
- GlobalProtect™ large-scale VPN (LSVPN) for simplified configuration and management

VLANs

- 802.1q VLAN tags per device/per interface: 4,094/4,094
- Aggregate interfaces (802.3ad), LACP

Network Address Translation

- NAT modes (IPv4): static IP, dynamic IP, dynamic IP and port (port address translation)
- NAT64, NPTv6
- Additional NAT features: dynamic IP reservation, tunable dynamic IP and port oversubscription

High Availability

Modes: active/active, active/passive
Failure detection: path monitoring, interface monitoring

Mobile Network Infrastructure

- GTP Security
- SCTP Security

Hardware Specifications

I/O

PA-5280 | PA-5260 | PA-5250 – (4) 100/1000/10G Cu, (16) Gig/10Gig SFP/SFP+, (4) 40G/100G QSFP28

PA-5220 – (4)100/1000/10G Cu, (16) Gig/10Gig SFP/SFP+, (4) 40G QSFP+

Management I/O

PA-5280 | PA-5260 | PA-5250 – (2) 10/100/1000, (1) 40G/100G QSFP28 HA, (1) 10/100/1000 out-of-band management, (1) RJ45 console port

PA-5220 – (2) 10/100/1000, (1) 40G QSFP+ HA, (1) 10/100/1000 out-of-band management, (1) RJ45 console port

Storage Capacity

240GB SSD, RAID1, system storage

2TB HDD, RAID1, log storage

Power Supply (Avg/Max Power Consumption)

571/685 Watts

Max BTU/hr

2,340

Power Supplies (Base/Max)

1:1 fully redundant (2/2)

AC Input Voltage (input Hz)

100-240VAC (50-60Hz)

AC Power Supply Output

1,200 Watts/power supply

Max Current

AC power supplies – 8.5A@100VAC, 3.6A@240VAC

DC power supplies – 19A@-40VDC, 12.7A@-60VDC

Max Inrush Current

AC power supplies – 50A@230VAC, 50A@120VAC

DC power supplies – 200A@72VDC

Mean Time Between Failure (MTBF)

9.23 years

Rack Mount (Dimensions)

3U, 19" standard rack

5.25" H x 20.5" D x 17.25" W (13.33cm x 52.07cm x 43.81cm)

Weight (Stand-Alone Device/As Shipped)

46 lbs (20.87 kg)/62 lbs (28.13 kg)

Safety

cCSAus, CB IEC 60950-1

EMI

FCC Class A, CE Class A, VCCI Class A

Certifications

See <https://www.paloaltonetworks.com/company/certifications.html>

Environment

Operating Temperature: 32° to 122° F, 0° to 50° C

Non-Operating Temperature: -4° to 158° F, -20° to 70° C

3000 Tannery Way
Santa Clara, CA 95054

Main: +1.408.753.4000
