

ACCELERATING WIRELESS PRODUCTIVITY

Experience smarter designs, premium quality and better value with AccelTex Solutions

AccelTex Solutions is an established manufacturer of high-quality wireless LAN products and accessories. With over 20 years of experience in the wireless industry they use their deep understanding of Wi-Fi networks to design products with the user and installer in mind.

Their innovation accelerates productivity by reducing the number of tools required, and the time taken to deploy networking equipment.

AFFORDABLE QUALITY

AccelTex are committed to quality and they demand superior performance from their products. They have ISO certified manufacturing facilities and products undergo rigorous third-party testing. Their extensive manufacturing experience has enabled them to drive down the cost to the consumer, allowing customers to achieve a world-class network at a great price.

STRATEGIC TECHNOLOGY ALLIANCES

AccelTex have developed long-term strategic alliances with leading wireless technology vendors to provide a wide range of complimentary products including access point antennas, mounts, enclosures, skins and power solutions.

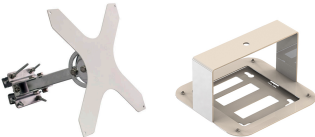

PRODUCTS

Wireless Antennas

- Dual-band patch and omni antennas for any AP manufacturer
- Small form factor
- Unique mounting solutions
- Easy and quick to install
- Varying degrees of beamwidth and gain

Antenna & Access Point Mounts

- Designed with the installer in mind for fast and simple AP or antenna mounting
- Custom design available for challenging mounting scenarios

Enclosures

- Compatible with any AP or modem manufacturer
- Innovative T-Bar and classic backplate design
- Pre-drilled connector hole options
- Heated and cooled enclosure options
- NEMA protection for outdoor and harsh environments

Cabling & Cable Adapters

- Prebuilt low-loss cable assemblies
- Variety of lengths and connector combinations available

Power Solutions

- Solar and UPS solutions for off-grid and mission-critical power applications
- In-house engineering and design services available

Lightning & Surge Suppression

- DC-6GHz lightning protection for outdoor deployments
- Ethernet surge suppression for any AP or modem deployment in-building

Site Survey Battery Pack

- Lightweight and compact
- Provides isolated and uninterrupted PoE/12V power
- USB-C and USB 2.0 port
- 7500 mAh battery capacity
- Charges in 3 hours
