

WAREHOUSING & LOGISTICS

Enabling a world that can trust wireless connectivity to be simple.

GXC ONYX is a comprehensive private cellular network for warehouses, providing secure, low-latency connectivity essential for efficient operations. It enables seamless IoT integration, real-time inventory management, and M2M communication. Leveraging data analytics, GXC ONYX drives predictive maintenance and operational optimization. Its security protocols ensure data integrity, while the scalable mesh architecture supports evolving warehouse demands, offering a future-ready infrastructure that's easy to deploy and manage.

Benefits of GXC ONYX

Improve Efficiency

Create faster, more reliable communications and operations, reducing downtime and costs

Secure Data

Ensure data is collected reliably and securely, without interference from other networks or devices

Complete Coverage

Provide unparalleled connectivity and coverage at a low-cost vs. public networks, satellite or Wi-Fi

Cost Effective

Lower network management cost, reduce downtime, and optimize energy usage and waste

Use Cases for Industrial Manufacturing

Real-time inventory management

Indoor navigation for vehicles and robots

Real-time workforce monitoring and communication

Augmented Reality (AR) guided picking

Enhanced safety and security systems

Warehouse automation and control

Warehouse management system (WMS) integration

Warehouse robotics communication and control

Warehouse security and access control

Network segmentation for sensitive information

Mesh Delivers Connectivity Anywhere

GXC offers the world's only patented mesh-based private cellular network, providing the industry's most versatile deployments. Experience the advantages of GXC's innovative approach:

- Rapid, cost-effective network deployment
- Easily move, relocate, or repurpose your network
- Rural internet access without LAN/fiber installed

Get Started Today
