# 3 Easy Steps to Great Wi-Fi Every Day

## Evolution of the Wi-Fi Lifecycle

Step 1

A Great Network Starts with a Great **DESIGN**

Step 2

**VALIDATE** with Super Accurate Sidekick Measurements

Step 3

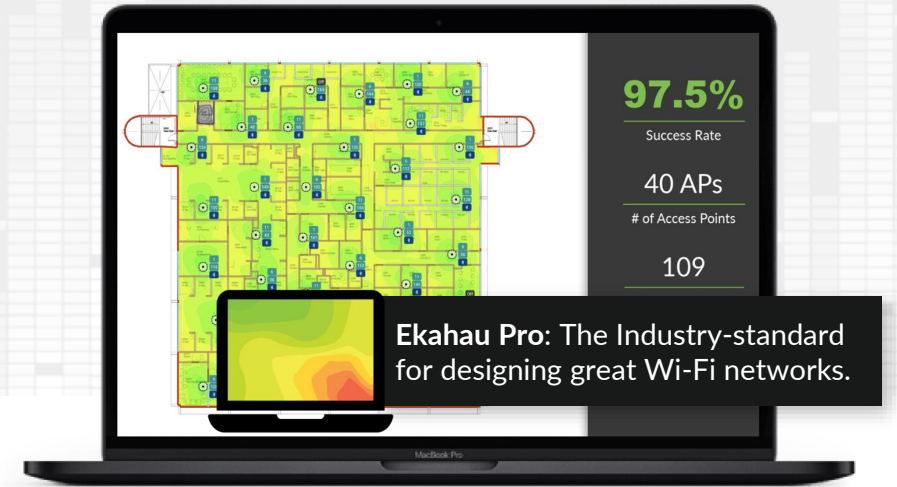

Maintain Great Wi-Fi with Regular **HEALTH CHECKS**

STEP 1

STEP 2

STEP 3

# A Great Network Starts with a Great Design

## INPUT

Get your requirements in order

Concrete & Steel Exterior

Glass Conference Rooms

Streaming 4K Video

Real-time Voice

Email

4,000 Employees

6,000 Peak Users

Tall Metal Racks

2.4 GHz Inventory Scanner

-67dBm everywhere

## OUTPUT

Wi-Fi perfectly designed to your business needs

- The **RIGHT** number of APs  
Get awesome Wi-Fi performance and reliability without overspending on unnecessary infrastructure.
- In the **RIGHT** locations  
Using thousands of iterations, Pro helps you identify the exact right locations to mount your wireless access points.
- With the **RIGHT** configurations  
Skip the guesswork with automatic channel plans and AP settings perfectly tuned to your requirements and layout.

STEP 1

STEP 2

STEP 3

# Validate Your Design with Super Accurate Sidekick Measurements

## ACCURACY MATTERS

Your design relies on the accuracy of your floor plan, your inputs and your measurements to perform like you intended.

## THE SIDEKICK IS ACCURACY DEFINED

Fastest, most accurate, all-in-one Wi-Fi diagnostic and measurement device.

- Validates if your design will work in the real world
- Identifies invisible interferers you might not know about
- Saves you money by getting it right the first time, before you run cables or commit to a costly deployment

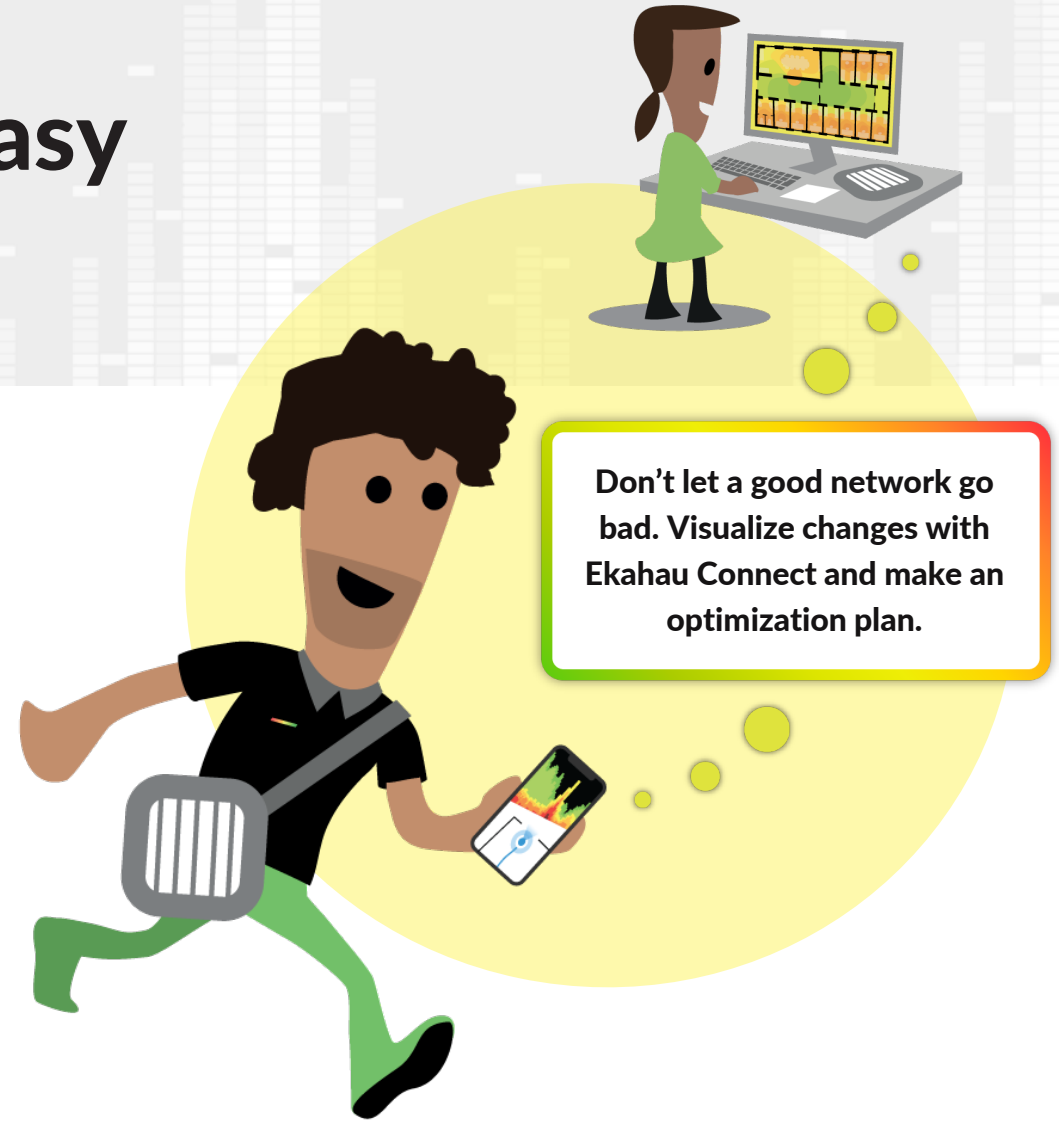

**Dongle Warning!** USB Wi-Fi dongles and internal adapters have huge measurement variances and are not purpose-built for site surveys. Don't put your Wi-Fi network at risk!

# Maintain Great Wi-Fi with Easy Performance Health Checks

Your wireless network needs frequent health checks to account for changes over time:

- Troubleshoot proactively and spot interference issues before they become major outages
- Identify and address network-impacting changes
  - Adding new employees or devices to the network
  - Onboarding more bandwidth-hungry applications
  - Making physical changes to office architecture, furnishings or even fluctuating inventory levels
- Ekahau tools are so powerful and sophisticated that anyone can use them to collect data

Don't let a good network go bad. Visualize changes with Ekahau Connect and make an optimization plan.

# 3 Easy Steps to Great Wi-Fi Every Day

## Real-World Implementation

Step 1

### DESIGN

#### PREDICTIVE DESIGN

Predictive design creation  
in Ekahau Pro

Step 2

### VALIDATE

#### PRE-DESIGN SURVEY

Onsite RF & Environment  
check (Update predictive)

#### PRE-DEPLOYMENT SURVEY

AP on a Stick Survey in  
challenging environments  
(Validate predictive)

Step 3

### HEALTH CHECKS

#### POST-DEPLOYMENT SURVEY

(Validate deployment)

#### PERIODIC HEALTH SURVEY

Account for change over time

#### TROUBLESHOOTING SURVEY

Something broken? Fix it!

DEPLOYMENT

# Ekahau Insights

- Automated, Fast & Easy Wi-Fi Performance Analytics
- Complements Existing Management Systems
- Global Visibility into Network Health and Quality Across All Sites
- Built-in Quality Analytics
- Heatmap Cloud Viewer

**Time for a live demo** 

# Ekahau Survey 2.0

- New UI
- Inspect Mode
- Customizing Visualizations View
- Locking Sidekick to Scan Specific Channels

Let's see how these  
new features are  
used in practice... 🤖

# APoS - Warehouse

# Common Wall Materials and their *Average Attenuations*\*

\*For accurate measurements, use an Ekahau Sidekick!

Drywall  
3dB

Bookshelf  
2dB

Exterior Glass  
3dB

Solid Wood Door  
6dB

Marble  
6dB

Brick
