Active Survey Data Collection Summary

Active Mode	RTT	Packet Loss (% or #)	Jitter	Data Rate	Throughput	AI Pro (macOS/Win)	Survey App (iOS/Android)
Ping	✓			✓ ²		✓	✓
UDP		✓	✓	✓ ²	✓	✓	
TCP			✓ ¹	✓ ²	✓	✓	

- 1) Jitter is displayed in the visualization when TCP tests are performed; however, the reported jitter is 0ms at these locations.
- 2) Visualizations reflect AP capabilities advertised in beacon frames.

Active Survey Best Practices

- Attempt to convince stakeholders **ONLY** passive is required
- Budget **~7x** more for project (\$ + time)
- Walk in **UDP** mode (**receive**)
- Walk again in **UDP** mode (**send**)
- Walk again in **Ping** mode (**RTT**)
- Walk again in **TCP** mode (**receive**)
- Walk again in **TCP** mode (**send**)
- Before walking, did you remember to **disable** the SSID on **ALL** neighbouring APs to prevent premature **roaming**?

“Find your
flow.”
